

FACTS

LOOP CORNER

171

Loop Corner is a new member of the Loop family. The 90-degree module combines with Loop Line to delimit a ball court or a sandbox while also providing seating. Loop Corner is also designed for use as a number of differently shaped benches. For example 4 modules can be combined to create a square, while 3 Loop Arc modules form a circle.

Design: AART Designers

TECHNICAL DATA

Material

Rotation moulded polyethylene, 6mm thick, dyed. Moulded in one piece. UV-resistant, stands up to weather, wear and tear. The material is suitable for granulation and recycling.

Surfaces and friction

The mould is sandblasted to provide a rough surface to increase friction and minimize slippage on the surface of the final product.

Dimensions

One module: L1400xB1400mmxH400mm, width (cross section): 400mm. Volume: 250 litres. 3-4 seats inside / 4-5 seats outside.

Combinations

Form Loop Corner like an "O" (square, 4 modules), like a "C" (2 modules), or like a "S" (2 or more modules). Also combine Loop Corner with Loop Line and Loop Arc.

Assembling & fixation

The modules are joined with brackets (B4) at either end. Fill them with water (160 liter) / sand (265 kg) or fasten them to the ground. Brackets to be ordered separately.

Maintenance

This product withstands most cleaning agents and chemicals and can be cleaned using a high-pressure cleaner. The colour can be revived using vinyl cleaner or similar.

Family

Loop, Loop Light, Loop Arc, Loop Line, Loop Cone
